Dear Commission EHU,

let me explain why I think I am worthy of receiving a grant.

I position my work as a versatile combination of various fields, such as studying the history and heritage of European art, depicting contemporary art, and creating my own unique style. My creativity is impossible without studying art, creativity, and artistic trends. I wholeheartedly share the university's mission to promote the liberal European concept of free art. I believe that my projects and works of art are directly related to this idea.

In addition, I have a strong passion to use my creative potential to make a positive impact on society. I am actively looking for opportunities to use my artistic skills to promote social change and advocate for important goals. I have participated in numerous public art projects dedicated to issues such as the Legacy of European Theater and European History.

Furthermore, I have consistently demonstrated my commitment to art and actively sought opportunities to further develop my skills and knowledge in this field. I took part in relevant courses, seminars, and exhibitions, as well as collaborated with other artists to develop my creative potential and broaden my horizons.

In conclusion, I believe that my creative potential, the versatility of my work, my commitment to the visual arts, and my passion to use my skills to have a positive impact on society make me a worthy candidate for a grant from the European Humanities University. If I have such an opportunity, I am sure that with the support of the university, I will be able to make a significant contribution to the field of fine arts and my own creative development.

Thank you for considering my application.

Усяго добрага!

Best Regards,

*Veronika
