

Topics for individual research projects

1. Necessity of harmonised company law rules at the European level.
Interpretation of freedom of establishment after *Cartesio* case.
2. Meaning and necessity of disclosure rules of European company law at different stages of company formation and operation.
3. The aims of capital requirements generally and the rationales of regulating this issue at the EU level.
4. Interpretation of the Market Abuse Directive after *Spector Photo Group* case.
5. Regulation of formation and operation of a group of companies at the European level.
6. Procedural and substantial requirements for mergers and takeovers under European competition law and European company law. Are company law rules co-ordinated with/adjusted to competition law rules?
7. Conceptions of corporate tax harmonisation (Common Corporate Consolidated Tax Base, Home State Taxation, Single European Income Tax).
8. Necessity of creation of genuinely European, supranational company types (especially why there are several company types and if a new company type - European private company - shall be created).
